

EcoAgents

What is an EcoAgent?

When Kristie and Breanne teamed up mid 2008 they decided on the real estate team name - Eco Agents! Ecotruly represents their Agents passion, how they run their business, but more importantly, the niche market they are specializing in.

Kristie and Breanne recently completed the Built Green Builder Training Workshop (see certificates below), and continue their "green" education at every opportunity. Currently members of the National Association of Green Agents and Brokers (NAGAB) Kristie and Breanne are completing the required training offered by NAGAB. Eco Agents are also members of the Alberta Chapter of the Canada Green Building Council, attending events to keep at the front of this business. This competitive edge of ongoing training puts them ahead of other realtors, helping buyers to decipher new building techniques and technology to figure out what's right for them. Their enthusiasm in selling retro-fitted or Green Built homes is also unmatched.

Does that mean they only work with green buyers and sellers? Absolutely not!

Buying an older home is really the ultimate act of recycling.

Eco Agents Also Give Back

As EcoAgents, we firmly believe in giving back. We also believe that our neighborhood extends to all four corners of the earth. For this reason we start and continue one Kiva loan for every Real Estate transaction. Visit <http://www.kiva.org/lender/ecoagents> and see our success in creating more lucrative lives for our global neighbors.
